VIMS Shoreline Permit Application Report # 01-0212

APPLICANT: TERHUNE, GERALD C.
Immediate Waterway: Corrotoman River
Locality: LANCASTER COUNTY
Purpose: Erosion Control, Water Access
Application Type: Wetlands
Site Inspection: 3/7/01
Report Date: 3/8/01

Type of Activity | Proposed Extent | Project Location
--- | --- | ---
Riprap (ft) | 150 | Lancaster County
Impact Intertidal Beach Community (Type XIII) (ft2) | 300 |
Fill Intertidal Beach Community (Type XIII) (ft2) | 150 |
Total Impacts (ft2) | 300 | 300
Total Impacts (Wetlands) | 300 |
Total Impacts (Subaqueous) | 0 | 0
Total Impacts (Beach/Dune) | 0 |
Total Fill (ft2) | 150 |
ANNOUNCEMENT

Information provided in this report is only the environmental and marine resources input into the decision making process and is based on biological, chemical, geological, and physical factors affecting the marine environment at and in the vicinity of the proposed activity. Parameters of the marine environment which may influence recreational, commercial, or industrial activities which are dependent on the marine environment are also considered where applicable.

The Virginia Institute of Marine Science (VIMS) is aware that regulatory or administrative bodies who weigh the overall potential public and private benefits and detriments in arriving at decisions must also consider other factors such as economics, aesthetics, zoning, or community desires.

Comments:

The flagged alignment for the toe of this revetment is near mean high water about 2 feet from the bank. Minor bank grading is also proposed. The marine environmental impacts appear to have been minimized and we have no objections to this project.

Karen A. Duhring  
Marine Scientist
Hydrologic units represent smaller, isolated watersheds defined by topography and flow direction. These units can be thought of as insulated ecosystems or landscapes within which resources can be managed at a larger scale. The cumulative impact of a project to resources within a hydrologic unit may be significantly greater than the impact to the larger watershed above.
Permit Site Study Area

Lancaster County
RAPPAHANNOCK RIVER
Corrotoman River

Project site

Rappahannock River watershed

Tidal Marsh Inventory - TMI
- Arrow Arum-Pickerelweed
- Big Cordgrass
- Black Needlerush
