VIMS Shoreline Permit Application Report # 03-0696

APPLICANT: BROADWATER SEAFOOD, INC.
Immediate Waterway: Parting Creek
Locality: NORTHAMPTON COUNTY
Purpose: Commercial Construction
Application Type: Wetlands
Site Inspection: 5/1/03
Report Date: 5/15/03

Type of Activity

ATTENTION

This assessment is based on biological, chemical, geological, and physical factors affecting the marine environment at and in the vicinity of the proposed activity. Parameters of the marine environment which may influence recreational, commercial, or industrial activities which are dependent on the marine environment are also considered where applicable.

The Virginia Institute of Marine Science (VIMS) is aware that regulatory or administrative bodies who weigh the overall potential public and private benefits and detriments in arriving at decisions must also consider other factors such as economics, aesthetics, zoning, or community desires. INFORMATION PROVIDED IN THIS REPORT IS, THEREFORE, ONLY THE ENVIRONMENTAL AND MARINE RESOURCES INPUT INTO THE DECISION MAKING PROCESS.

Comments:

We have reviewed this proposal from a marine environmental viewpoint and it is our opinion that the individual and cumulative direct adverse impacts resulting from this activity are minimal. If there are concerns regarding the resuspension of previously contaminated sediments, then the splash apron should be enlarged as necessary to ensure no disturbance of the bottom due to the outfall or the pipe outfall, itself, should be extended into water deep enough that the exit stream will not reach the bottom substrate even under the lowest of tidal lows.

Thomas A. Barnard, P.E.
Marine Scientist
Hydrologic units represent smaller, isolated watersheds defined by topography and flow direction. These units can be thought of as insulated ecosystems or landscapes within which resources can be managed at a larger scale. The cumulative impact of a project to resources within a hydrologic unit may be significantly greater than the impact to the larger watershed above.
To Wetlands Board: Please indicate Wetlands Board action on this sheet and return to VIMS

Application Number: 03-0696
Name: Broadwater Seafood, Inc.
Locality: Northampton County
Waterway: Parting Creek
