

Progress Rpt 3

Commercial watermen have completed their spring and summer data collection and are preparing for their fall data collection period. Residential participants have been collecting data and that activity is ongoing and scheduled to end November 30th (last day of the crabbing season). Surveys of waterfront residents on their 'willingness to pay' for biodegradable components added to crab pots have been sent. So far 32% of the surveys have been returned. Data entry and analysis is ongoing.
